Kind Attn: Mr C K Muralidhar / Mr Ramakrishnan G K

Dear Sir,

Sub: Performance of VRLA batteries of your make

We have purchased a number of Valve Regulated Lead Acid batteries of both 48V 600Ah and 48V 2000Ah capacities of your Exide Powersafe make, for supply of Switching Exchange Equipments to the Department of Telecommunications, Government of India (now Bharat Sanchar Nigam Limited). The approximate quantities are as follows:

Year of Purchase	Our Tender ref	Approximate Quantity Purchased from Exide Industries
2000-2001	FDTOD003	32 Sets of 48V 2000Ah and 60 sets of 48V 600Ah
1999-2000	FPP9E023	84 Sets of 48V 2000Ah and 72 sets of 48V 600Ah
1998-1999	FPP8E023	16 Sets of 48V 2000Ah and 10 sets of 48V 600Ah
1997-1998	FOP7C023	6 Sets of 48V 1000 Ah and 8 sets of 48V 600Ah

These batteries were supplied along-with our Exchange equipment to various consignees under different telecom circles throughout India and all exchanges (except for the ones supplied recently) have already been commissioned and are functioning satisfactorily. Your batteries have given us a very satisfactory performance at all places throughout the country, be it in Jammu & Kashmir, Rajasthan, Maharashtra, the North East or even in Port Blair. We have not received any adverse remarks from any consignee on performance of your batteries (especially for the ones supplied in 1997-98 and 1998-99), which have crossed two to three years of service.

The only complaints we have received are transit damages and pilferage of copper connectors from the accessories box, particularly from far off places and we request you please improve the packing of your batteries, especially the ones being sent to far off locations.

Thanking you,  
Yours sincerely,  
for ITI Limited
